- Programming in Java –MOOC NPTEL (July, 2022 - Oct, 2022), IIT Kharagpur

COVER LETTER

Respected Sir/Madam,

I am excited to apply for the software developer position at your prestigious Company. As a recent graduate with a Master's degree in Computer Application, I am eager to bring my technical skills, passion for coding, and willingness to learn to your team. I am confident that my enthusiasm for software development and my academic achievements will make me an excellent fit for this role.

During my time at TIMSCDR, I gained experience in programming languages such as Java, Python, and Android. I have also worked on various software development projects, including developing a web application using PHP and creating a server-based application using Python. These experiences have given me a strong foundation in software design principles and software development life cycle.

I am passionate about staying up-to-date with emerging technologies and incorporating them into software development processes. I have also done an Internship at Indian Oil Corp. Ltd. to enhance my coding skills and work on live projects, so that I can understand the client's requirement as well. At IOCL, I have worked on Frameworks such as SpringBoot and Flutter to develop the projects.

In addition to my technical skills, I have demonstrated my ability to work collaboratively and communicate effectively with others. I have worked in various College Festivals and Social Activities as part of DLLE with my classmates from diverse backgrounds and have gained experience in managing peoples and meeting deadlines.

I am excited about the opportunity to join as a Software Developer & contribute to your innovative software solutions. I am eager to learn and grow as a developer and believe that the team would provide a supportive and challenging environment to do so.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Sincerely,
Lacky Singh
